DATASHEET

Risk Management for IRAM2

IRAM2 appeals to small to medium enterprises to large companies, which is why we've engineered agility into this Cloud-based application to help you automate and accelerate your adoption and use of IRAM2.

The Challenge

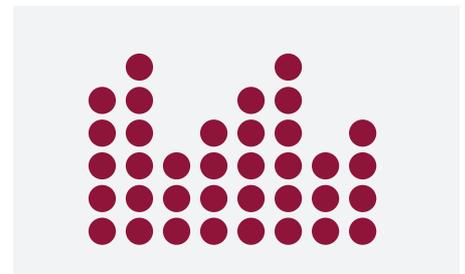

The foundational elements to any risk management program involve the identification, assessment, and tracking of risks. Many organizations make life difficult for themselves by concocting homegrown, spreadsheet-based, risk registers and assessments. This makes program management, tracking of assessments and proving you are following a specific framework extremely challenging and onerous.

The Solution

SureCloud's Risk Management for IRAM2 solution has been developed in conjunction with key ISF community members and designed with the fundamental objectives of repeatability, efficiency, and usability in mind. ISF designed their Information Risk Assessment Methodology 2 (IRAM2) to provide "risk practitioners with a complete end-to-end approach to performing business-focused information risk assessments", SureCloud's Information Risk Assessment Management application assists you in making this happen.

With SureCloud's Risk Management for IRAM2, individual assessments have been streamlined, and no longer exist as standalone activities. Multiple information risk assessments can run in parallel and changes can be made retrospectively without having to repeat every subsequent step. These assessments are supported by SureCloud's shared libraries (for example Assets, Threats, and Controls) that will continue to grow over time. Risk Management for IRAM2 also provides aggregated real-time reporting of information risk on interactive and customizable dashboards.

“SureCloud's solution makes IRAM2-compliant risk management easy, by drastically simplifying the implementation of the methodology. From the testing phase alone, we found the SureCloud application to immediately start solving our issues.”

Key benefits

Simple Solutions Delivering Enterprise Outcomes

SureCloud is a provider of cloud-based, integrated Risk Management products, which reinvent the way you manage risk.

- Streamline your processes
- Works as your single source of truth
- Automate your activities
- Real time dashboarding and reporting
- Great user experience
- Integrate your Governance, Risk and Compliance journeys

Compliance Management and ISF SoGP

Together with Compliance Management, pre-loaded with the ISF Standards of Good Practice or Security Health check, an organization can ensure that its operational controls are appropriate and effective for the risks identified using the IRAM2 methodology.

“From the testing phase alone, we found the SureCloud application to immediately start solving our issues. Through SureCloud’s centralized platform, we can assess our risk profile in a way that’s not only user-friendly but also highly effective for our business.”

Vikram Sokhi, Information Security Analyst, Thames Water
