DATASHEET

ISMS Suite

It can take up to 2 years for large companies to complete the ISO 27001 journey. Make this journey easier, simplify and automate gaining and sustaining compliance with our ISMS Program Tracker. Know where to start, how to get there and how to demonstrate your achievement with SureCloud.

The Challenge

ISO 27001, the most popular standard in the world for managing information security, benefits small to large organizations alike. Many organizations seek certification to comply with legal, contractual or regulatory requirements but how do you start and then manage the program through to certification and beyond? Additionally, once you gain certification, how do you ensure you maintain it?

The Solution

SureCloud's Information Security Management System (ISMS) Management solution automates and simplifies the process of obtaining and then staying compliant with ISO 27001 certification. SureCloud's ISMS Management solution provides a framework for bringing together ISO 27001 Policies, Procedures, Metrics, Controls, and Risks. SureCloud's ISMS Management software then presents this information in a manner which helps internal teams understanding what needs doing and by whom. It also helps reduce the time spent by auditors assuring the ISO framework.

“SureCloud has minimized the threat of non-compliance, enhanced the security of our data and given us a visibility that we simply didn't have previously. And it's all delivered in a single, cost effective package.”

SureCloud ISMS Suite Benefits

- Eliminate the uncertainty and mystery of how to gain and sustain compliance and certification
- Coordinate all activity and documentation via the SureCloud Platform
- Benefit from live auto updates, which are pervasive through the SureCloud Platform and the SureCloud ISMS Suite
- Simplify and expedite reports for senior management and others
- Reduce auditing time and make it easier for internal/external auditors to do their jobs
- Reduce administrative burden of ongoing compliance and certification

“One of the main benefits is that we now have a central view of compliance.”

IT Compliance Manager, Global Travel Company

Why SureCloud

SureCloud is a provider of cloud-based, integrated Risk Management products and Cybersecurity services, which reinvent the way you manage risk. SureCloud connects the dots with integrated Risk Management solutions enabling you to make better decisions and achieve your desired business outcomes. SureCloud is underpinned by a highly configurable technology platform, which is simple, intuitive and flexible. Unlike other GRC Platform providers, SureCloud is adaptable enough to fit your current business processes without forcing you to make concessions during implementation; meaning you get immediate and sustained value from the outset.
