

## Max does Cybersecurity

### Challenge

Organizations need to continually adapt their cybersecurity functions in response to internal and external events; transformational changes such as remote working, migration to the cloud, or investments in new technologies. Responding to this change is hard and brings with it a host of difficult decisions and unknown threats, especially when faced with challenges that include:

- Understanding and managing your cybersecurity posture and journey to maturity
- Making complex decisions without the assurance of expert opinions
- Managing the need for a broad array of cyber and risk skills, with peaks and troughs in demand, on finite budgets
- Becoming a victim of an unexpected incident with no process or precedent, and with no one to turn to for advice
- Running many cybersecurity projects, without a holistic view of activities or progress

### Solution

Max does Cybersecurity gives your organization access to an industry-leading cybersecurity service backed by the SureCloud guarantee of quality and availability. This includes:

- A world-leading platform providing consolidated dashboards of all your cybersecurity activities
- The ability to establish, operate and continually improve your cybersecurity program to meet the demands of the modern era
- Access to senior, skilled professionals to help supplement decision making:
  - Validation of key strategic decisions
  - Trusted experts to act as a “sounding board”
  - Practical experience from people who have performed CISO and “Head of” roles
- On-demand access to a wide range of technical and consultative skills
- On-demand and flexible security testing from traditional vulnerability assessments to blue and red team engagements
- A range of cybersecurity collateral, including cybersecurity training videos, policy and procedures.

SureCloud’s Max does Cybersecurity will give you effective visibility of your cybersecurity posture, helping you to understand what’s important and what you need to pay attention to. The solution also provides access to industry-leading cybersecurity services, risk and compliance application software, and expert advice to validate your business-critical decisions, all as part of an easy to consume subscription service with no hidden costs or surprises.

## Benefits

Max has three levels of subscription, designed to help organizations looking to establish a program, through to those with mature processes already in place. By subscribing to any one of the levels that Max does Cybersecurity offers, you will be able to realize the following benefits:

- No need to recruit full-time experts used for a fraction of the time
- Confidence that all the bases are covered with access to a large, accredited team who hold diverse skills from penetration testing to cybersecurity program management and oversight
- Visibility of risk and levels of improvement through the Gartner recognized GRC applications to support analysis, reporting and remediation
- A cost-effective solution for your cybersecurity challenge through a flexible subscription cost model
- Peace of mind regarding emerging threats with up to date training and briefings
- Assurance from a trusted partner to take your concerns away.

Max will provide you with the confidence that your organization’s cyber risks are in good and capable hands.

## Max does Cybersecurity Essential

Provides a low cost, self-service option for organizations wishing to build and operate a ‘foundational’ cybersecurity function. The solution provides security posture self-assessments, basic industry policies and controls (NIST CSF or ISO27001), and a range of security bolt-on packages to manage the most common cyber threats.

Experts	Applications	Knowledge
Cyber Posture Self-Assessment	Cyber Posture Management	Policy Templates
External Penetration Test	Vulnerability Assessment	Staff Briefing Webinars
12 “Expert On-Demand Requests”	Phishing Simulation	Advisory Assets
	Risk Register	

## Max does Cybersecurity Business

Provides a centrally coordinated cybersecurity function, guided by SureCloud’s cyber and risk experts, which moves from a foundational to a ‘best practice’ cybersecurity function. From team capabilities to threat modelling and incident management.

### Essential +

Experts	Applications	Knowledge
Annual CSA and Strategy Development	Asset Register (Risk Controls)	Leadership Briefing Workshop
Quarterly maturity improvement reviews	Incident Register	Networking Events
Internal Penetration test	Email Security Configuration Test	NIST Alignment
Threat modelling workshop	Password Breach Analyzer	
Incident Triage	Risk assessment

## Max does Cybersecurity Enterprise/Bespoke

For enterprise organizations or those facing specific challenges, SureCloud offers an entirely bespoke version of the Max does Cybersecurity offering. This tier applies to organizations facing challenges, including:

- **Transformation** – a tailored time focused Max does Cybersecurity program to align and drive an organization’s transformation program.
- **Organizations in Distress** – for organizations going through a commercially challenging period, a Max does Cybersecurity program can provide a suitable, cost-effective solution.
- **Mergers & Acquisitions** – Max does Cybersecurity delivers a perfect solution to organizations involved in M&A, and managing an estate of companies, needing to achieve and maintain, a targeted level of cybersecurity maturity.

The Enterprise/Bespoke tier of Max does Cybersecurity comprises the same elements – Expert, Applications and Knowledge – as Essential and Business but with each component built to meet the requirements of your business specifically.

“This is a brilliant product/service & represents real value to those of us running complex programs with small teams!”

Jake Bernardes, Head of Information Security at SingleStore
