

Manage Compliance Capability

DATASHEET

Manage your compliance challenges with the ideal combination of software and expertise.

In order to remain operational, your organization must comply with a number of different regulations and standards. Every year your compliance burden increases, resulting in resources being stretched further. Many organizations lack the necessary tools and expertise required to effectively maintain compliance with the most important laws and standards.

SureCloud's unique Capability-based approach provides the perfect combination of software and expertise your organization needs to effectively manage your compliance burden. Our industry-leading Compliance Management software is complemented by our consultancy services, which will bring deep domain expertise to your organization. SureCloud Consultants will help you to streamline and automate your compliance management processes and embed best practice into your operations.

The Challenge

- Managing compliance to multiple standards and laws is a complex process, involving multi-faceted tasks and the coordination of a large number of complex actions. Companies often lack the necessary tools and expertise required to manage these processes effectively.
- Organizations must identify, assess and prioritize all relevant legislation and standards and then determine their control approach to comply with each.
- Evaluations must take place to determine the relative importance of complying with each regulation or standard.
- The organization must devise strategies for complying with each identified standard, including the definition of detailed compliance processes.

The Solution

Transform your Compliance Management practice with SureCloud's *Capability*-centric approach. Our unique Manage Compliance *Capability* provides the tools and expertise you need to effectively manage your compliance risks. Our team of highly experienced Consultants will provide expert guidance to ensure your organization's successful transformation.

- We equip you with the software and expertise you need to manage your compliance burden; all delivered precisely at the point you need it.
- All compliance management processes leverage the SureCloud platform and its embedded, best-of-breed content.
- Leverage purpose-built compliance workflows for ISO27001, PCI DSS, NIST CSF, HIPAA, and CMMC
- Our expert Consultants apply the proven SureCloud IMAR (Identify, Manage & Assure, Remediate) methodology to safeguard your transformation.
 - **Identify** all regulations, frameworks and standards that your organization needs to comply with.
 - **Manage & Assure** – document and test controls to demonstrate that your organization is compliant. Leverage our Consultants' deep domain expertise to define detailed remediation processes and controls, in line with industry best practice.
 - **Remediate** all non-compliant controls against a clearly defined timeline.
- Our Gartner recognized Compliance Management software is used to track all remediation activities, to centrally store all data, and the SureCloud platform can also be used to deliver highly granular yet clear reporting.

Key Benefits

Achieve a clear view of cyber risk

Ensure your Compliance Management program effectively delivers compliance for your business. Achieve the necessary visibility and insight into your level of compliance, to minimize the risk of not complying with important standards and frameworks.

Adopt cyber risk management best practice

Embrace and embed recognized best practices, optimized for your organization by our expert Consultants, who will recommend robust processes for managing compliance.

Centralize and orchestrate your cyber risk management operations

Centrally manage all compliance processes via the powerful and highly intuitive SureCloud platform. Leverage our fully integrated content, including controls from leading providers, including the Secure Controls Framework. Remediation tasks can be allocated within our software, and all actions can be easily tracked.

Increase efficiency

Reduce manual and repetitive tasks by leveraging pre-built workflows, notifications, and reporting, to streamline and accelerate your compliance management processes.

Make smarter decisions

Inform your decisions with real-time reporting and built-in business logic, which helps you understand which areas are non-compliant, so you can act quickly to mitigate them.

Why choose SureCloud?

Embedded expertise

Our platform has been built and aligned with industry best practices. We worked with our clients to understand their needs and designed a solution that will help any organization become more effective at managing its compliance workloads. You benefit from that best practice and embedded expertise, out-of-the-box.

Fully integrated, best-of-breed GRC solutions

SureCloud's suite of Gartner-recognized Governance, Risk, and Compliance solutions provide a means of seamlessly managing a range of GRC operations. Our fully integrated solution-set eliminates data silos from your organization, increasing your operational efficiency and providing a more accurate overview of risk and compliance, across your organization.

Innovative, all-inclusive pricing

SureCloud's Manage Compliance *Capability* is sold as part of an all-inclusive subscription model, which includes everything from licensing, content, consultancy, implementation and professional services, in one flat fee.

“ We needed to find a way of linking various ideas together, both to streamline internal management and costs, but also to improve our GRC posture. All of the information we needed was sitting in multiple places, with no consolidation or unification. ”

Michael Light, Risk Analyst and GRC project sponsor. Prodigy Finance
