

Risk Management Capability

DATASHEET

Manage your key business risks with the ideal combination of software and expertise

Your organization is exposed to a wide range of risks, which could threaten your ability to remain operational and profitable. Managing these diverse risks has become a significant burden for most organizations, which often consumes substantial resources, while delivering sub-optimal outcomes for the business.

SureCloud's unique Capability-based approach provides the perfect combination of software and expertise your organization needs to effectively manage and mitigate your risks. Our industry-leading IT Risk Management software is complemented by our consultancy services, which will bring deep domain expertise to your organization. SureCloud Consultants will help you to streamline and automate your risk management processes and embed best practice into your operations, to ensure that your business-critical risks are managed as effectively and efficiently as possible.

The Challenge

- Managing the diverse risks that face your organization is a complex process, involving multi-faceted assessment and the collection of large quantities of data. Companies often lack the necessary tools and expertise required to manage these processes effectively.
- Organizations must identify, assess and prioritize all technology and business risks and then determine the impact of each on their business operations.
- Evaluations must take place to determine that risks are managed within the organization's risk appetite.
- The organization must devise remediation strategies for each identified risk, including the definition of detailed processes to implement cybersecurity and other controls to manage all significant business risks.

The Solution

Transform your Risk Management practice with SureCloud's *Capability*-centric approach. Our unique Manage Risk *Capability* provides the tools and expertise you need to effectively manage your IT and other business risks. Our team of highly experienced Consultants will provide expert guidance to ensure your organization's successful transformation.

- We equip you with the software and expertise you need to manage risk; all delivered precisely at the point you need it.
- All risk management processes leverage the SureCloud platform and its embedded, best-of-breed content.
- Our expert Consultants apply the proven SureCloud IMAR (Identify, Manage & Assure, Remediate) methodology to safeguard your transformation.
 - **Identify** all significant sources of risk, documenting these in a comprehensive risk register.
 - **Manage & Assure** – determine your organization's appetite for each identified risk through a range of interactive workshops and assessments. Leverage our Consultants' deep domain expertise to define detailed remediation processes and controls, in line with industry best practice.
 - **Remediate** all prioritized risks against a clearly defined timeline.
- Our Gartner-recognized IT Risk Management software is used to track all cybersecurity and technical remediation activities, to centrally store all data, and the SureCloud platform can also be used to deliver highly granular yet clear reporting.

Key Benefits

Achieve a clear view of organizational risk

Ensure your Risk Management program effectively protects your business. Achieve the necessary visibility and insight into your business risks to minimize the chance of breaches, data loss, ransomware attacks and downtime.

Adopt risk management best practice

Embrace and embed recognized best practices, optimized for your organization by our expert Consultants. Implement robust processes for identifying and prioritizing business risks and determining the most appropriate course of remediation.

Centralize and orchestrate your risk management operations

Centrally manage all risk management processes via the powerful and highly intuitive SureCloud platform. Leverage our fully integrated content, including controls from leading providers, such as the Secure Controls Framework. Remediation tasks can be allocated within our software, and all actions can be easily tracked.

Increase efficiency

Reduce manual and repetitive tasks by leveraging pre-built workflows, notifications, and reporting to streamline and accelerate your risk management processes.

Make smarter decisions

Inform your decisions with real-time reporting and built-in business logic, which helps you understand which areas are at risk, so you can act quickly to mitigate them.

Why choose SureCloud?

Embedded expertise

Our platform has been built and aligned with industry best practices. We worked with our clients to understand their needs and designed a solution that will help any organization become more effective at managing its GRC workloads. You benefit from that best practice and embedded expertise, out-of-the-box.

Fully integrated, best-of-breed GRC solutions

SureCloud's suite of Gartner-recognized Governance, Risk, and Compliance solutions provide a means of seamlessly managing a range of GRC operations. Our fully integrated solution-set eliminates data silos from your organization, increasing your operational efficiency and providing a more accurate overview of risk and compliance, across your organization.

Innovative, all-inclusive pricing

SureCloud's Manage Risk *Capability* is sold as part of an all-inclusive subscription model, which includes everything from licensing, content, consultancy, implementation and professional services, in one flat fee.

“ SureCloud’s technology will help us gain a holistic view of our risk and compliance program, enabling us to identify our priorities for the coming year more easily. ”

Eline van der Lugt, Head of Risk at Mollie
