

# Data Privacy Management Capability

## DATASHEET

### Manage your data privacy risks with the ideal combination of software and expertise.

Organizations must comply with an increasingly stringent and diverse array of data privacy laws, which have come into force across a large number of global territories. Businesses must ensure that they remain compliant and must fulfil the rights that consumers are given by data privacy legislation, or face financial penalties and reputational damage. Using manual processes to comply with privacy-related data requests, consumes significant resources and may lead to errors, which result in the organization being penalized.

SureCloud's unique *Capability*-based approach provides the perfect combination of software and expertise your organization needs to effectively manage and mitigate the risk of your business not complying with important data privacy laws. Our industry-leading Data Privacy Management software is complemented by our consultancy services which will bring deep domain expertise to your organization. SureCloud Consultants will help you to streamline and automate your data privacy management processes and embed best practice into your operations, to ensure that your personal data management requests are managed as effectively and efficiently as possible.

### The Challenge

- Managing and complying with the diverse data privacy laws around the world, is a complex and time-consuming process, which can lead to costly errors.
- Fulfilling consumer requests for access to the personal data your organization possesses can be a complex process, involving multi-faceted tasks and the management of large quantities of data, spread throughout the organization.
- Organizations often lack the necessary tools and expertise required to manage these processes effectively.

### The Solution

Transform your data privacy risk management operations with SureCloud's *Capability*-centric approach. Our unique Data Privacy Management *Capability* provides the tools, expertise and content you need to effectively fulfil your obligations and requirements specified by all major global laws. Our team of highly experienced Consultants will provide expert guidance to ensure your organization's successful transformation.

- We equip you with the software, content, and expertise you need to manage the risk of non-compliance; all delivered precisely at the point you need it.
- All data privacy management processes leverage the Gartner recognized SureCloud platform and its embedded, best-of-breed content.
- Our expert Consultants apply the proven SureCloud IMAR (Identify, Manage & Assure, Remediate) methodology to safeguard your transformation.
  - **Identify** all relevant data privacy laws as potential sources of risk, documenting these in a comprehensive risk register.
  - **Manage & Assure** – quantify the scale of data requests which your organization faces and your appetite for risk, through a range of interactive workshops. Leverage our Consultants' deep domain expertise to define detailed processes and controls to ensure that you remain compliant.
  - **Remediate** - Implement your plan to fulfil all data access requests, against a clearly defined timeline.
- Our Data Privacy Management software is used to track all tasks, to centrally store all data, and the SureCloud platform can also be used to deliver highly granular yet clear reporting.

## Key Benefits

### Achieve a clear view of data privacy compliance

Ensure your data privacy management program effectively maintains compliance for your business. Achieve the necessary visibility and insight into your compliance level.

### Adopt data privacy management best practice

Embrace and embed recognized best practices, optimized for your organization by our expert Consultants. Implement robust processes for fulfilling consumer requests for personal data.

### Centralize and orchestrate your data privacy management operations

Centrally manage all data privacy management processes via the powerful and highly intuitive SureCloud platform. Leverage our powerful and intuitive software to allocate tasks and track all actions.

### Increase Efficiency

Reduce manual and repetitive tasks by leveraging pre-built workflows, notifications, and reporting to streamline and accelerate data privacy management tasks.

### Make Smarter Decisions

Inform your decisions with real-time reporting and built-in business logic, which helps you understand which processes are not optimized, so you can act quickly to address them.

## Why choose SureCloud?

### Embedded expertise

Our platform has been built and aligned with industry best practices. We worked with our clients to understand their needs and designed a solution that will help any organization become more effective at managing its GRC workloads. You benefit from that best practice and embedded expertise, out-of-the-box.

### Fully integrated, best-of-breed GRC solutions

SureCloud's suite of Gartner-recognized Governance, Risk, and Compliance solutions provide a means of seamlessly managing a range of GRC operations. Our fully integrated solution-set eliminates data silos from your organization, increasing your operational efficiency and providing a more accurate overview of compliance, across your organization.

### Innovative, all-inclusive pricing

SureCloud's Data Privacy Management *Capability* is sold as part of an all-inclusive subscription model, which includes everything from licensing, content, consultancy, implementation and professional services, in one flat fee.

**“ The penalties for not achieving GDPR compliance are severe – up to 4% of our revenues. It was imperative that we got a solution in place that could not only help us achieve GDPR compliance, but would also make it quick and easy for us to demonstrate that compliance at any point, on request. SureCloud’s GDPR Suite fit the bill. ”**

**Ian Garratt, Data Protection Officer at Everton Football Club**
