

SureCloud[®]

SOLUTION SHEET

Compliance Management

Increased regulation and the risk of reputational damage associated with non-compliance are driving organizations to rethink the way they manage their compliance programs.

The Challenge

- How do you increase the ease and effectiveness of your compliance programs, across multiple business functions, different geographies and a variety of regulations?
- How can you demonstrate compliance to executives and auditors, and show progress at both the micro and macro level?
- How can you be sure of control efficacy, and ensure that remediation activities are prioritized by business risk, and are carried out in a timely fashion?

The Solution

SureCloud has a suite of Compliance Management software to aid your compliance journey. Compliance programs underpin the ability to assess the efficacy of controls, over many different standards and regulations. Control owners can attach evidence to controls, and control assessments can be issued to control owners. Auditors can review control activities and link control failure to the associated risks and policies, and issue remediation activities to control owners and track progress.

“After reviewing multiple vendor platforms, it became clear that SureCloud was best positioned to meet NICE’s needs in compliance management. Implementation timelines was a key factor in our choosing the SureCloud platform. They also have exceptional support.”

Daniel Clark, Senior Cloud Security Analyst, NICE

Key benefits

As well as providing the ability to centrally control your Compliance Management, SureCloud fully supports compliance with ISO 27001 and the PCI DSS, by providing in-depth functionality to support the end-to-end processes defined in the standards.

Our Compliance Management portfolio contains:

- Compliance Management
- PCI Compliance Management

“Previously we had been manually inputting PCI compliance data from all our sites across 15 countries into spreadsheets, which was time-consuming and difficult to use when reporting to both auditors and our board. Using SureCloud’s PCI Compliance Manager application we have been able to simplify our reporting and auditing processes, enabling us to monitor and ensure compliance continually. We now have high visibility of our compliance status from the reporting that application delivers, and the overall simplicity of the solution has greatly improved efficiency.”

Daniel Clark, Senior Cloud Security Analyst, NICE
