

SureCloud®

SOLUTION SHEET

Data Privacy Management

Engineered for any size organization, stay strong beyond your cybersecurity test and receive trend data for continuous improvement.

The Challenge

Some of the key challenges to consider when tackling Data Privacy Management are:

- How do you gain visibility into the current status of your privacy program and track the progress of the various work streams?
- How do you track and document your program without resorting to using many isolated Word or Excel (or similar) documents which themselves cause significant pain and complexity?
- How do you coordinate compliance activities across your many stakeholders?

The Solution

SureCloud has a suite of Data Privacy Management solutions to aid your privacy compliance journey. From building program foundations in data and process mapping to developing workflows around Subject Access Requests, Data Transfers, DPIA's and everything in between, SureCloud can support you as you mature your privacy program.

Our innovative program tracker gives you a rolled-up view of the entire compliance program, allowing you to focus on areas that need attention, as well as provide status reporting to those that need it. Seamless integration and data sharing across the wider SureCloud portfolio also means that true integrated data privacy and risk management is finally within reach.

“From the platform, I can track actions and monitor progress to ensure that we are managing our GDPR compliance on a continual basis. In short, this level of visibility of data assets, processing activities and actions provided by the SureCloud platform has exceeded our expectations.”

Kieran O’Shea,
Head of Compliance and Data Protection Officer, U Account
