

SureCloud®

DATASHEET

Compliance Management

The ever-increasing regulatory demand on businesses, along with the risk of reputational damage, SureCloud are simplifying and optimizing the way you manage compliance.

Your Challenge:

Complying with various laws, standards, frameworks and regulations can be a complicated, expensive and time-consuming process:

- Managing and measuring compliance against different standards and regulations, among various departments in your business, often results in duplicated effort.
- Defining responsibility and enforcing accountability within a compliance program is challenging, as you attempt to obtain evidence, exceptions or remediation updates.
- Providing accurate, timely and impactful updates to senior management is difficult and time-consuming.

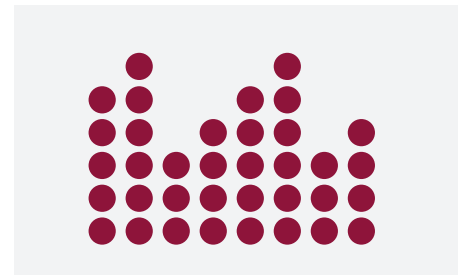

Our Solution

SureCloud's Compliance Management solution aims to help you centralize your compliance management activities and provides simple, easy-to-use reporting on all compliance obligations.

The solution provides an out-of-the-box control structure, which includes a regulation and control library, independently validated and maintained by the Secure Control Framework (SCF). The SCF is pre-populated with hundreds of controls and assessment questions pre-mapped against an exhaustive list of global and regional standards and regulations, all ready to deploy with an intuitive wizard-based setup.

Compliance professionals can delegate routine compliance tasks, assign control ownership, self-assess or independently test the maturity of controls, identify and resolve any deficiencies.

“SureCloud’s clever and unique adoption of the Secure Controls Framework (SCF) as one of the built-in control sets available in their solution raises the stakes in the industry for a comprehensive compliance solution.”
