SureCloud and BitSight – Vendor Risk Management

The Joint Offering

BitSight provides an automated security rating to help understand how well vendors are managing information security risk. Companies can maximize their investment in BitSight by bringing security ratings into SureCloud's vendor risk management solution to help validate assessment responses. The benefit of the partnership includes removing subjective vendor tiering and improved automation leading to greater decision making.

With SureCloud, organizations can launch an automated vendor risk management process that is up and running in days and is simple-to-use for rookies and veterans alike. Your team can focus on vendor risks, while SureCloud worries about the technology for you.

- Hands off vendor onboarding
- Automated decision making
- Powerful real time reporting

Is your Vendor Risk Management Process...

- Inefficient and run out of multiple spreadsheets, which involves you manually sending and receiving emails to vendors from your inbox?
- Highly time-consuming requiring the launching and reviewing of risk assessments on all vendors regardless of their material impact to your business?
- Lacking in a robust, centralized reporting capability to show vendor risk posture to a variety of stakeholders?

SureCloud and BitSight Together...

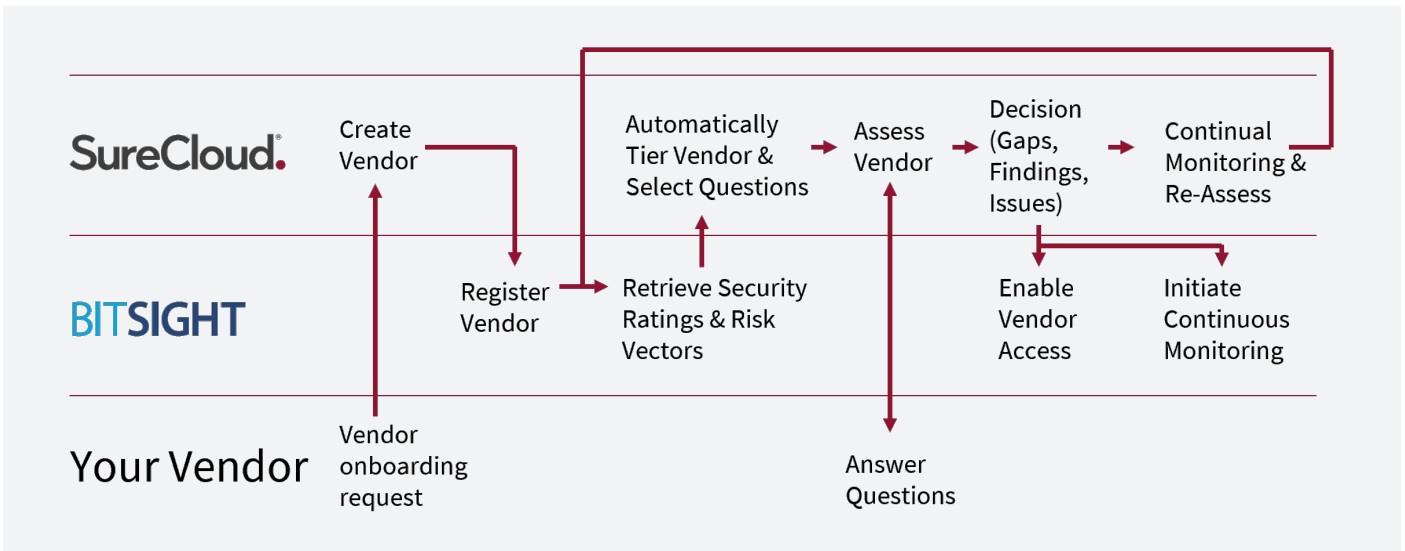

- Integrates BitSight security ratings into SureCloud vendor profiles and assessments to ensure the correct questions are automatically selected and sent to your vendors.
- Speeds up the process of onboarding, assessing and reporting on your vendor assessments.
- Allows you to utilize BitSight security ratings to categorize your vendors and associated risks in a single portal.
- Provides you with powerful insights via centralized, real-time dashboards and reporting.

“We’ve become far more efficient and have made substantial time savings by using the SureCloud Platform, as many of the larger solutions would have taken years to implement.”
