

SureCloud[®]

DATASHEET

Cybersecurity-as-a-Service (CaaS)

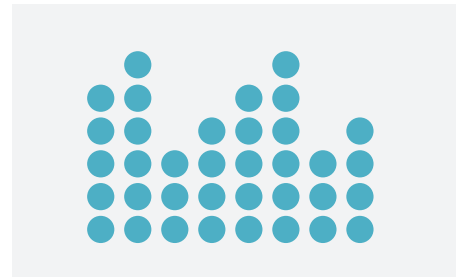

The Challenges

- Is your Board looking for information relating to your cybersecurity posture, and you don't know what to tell them?
- Have you ever experienced an incident and needed prompt security support?
- Or had a penetration test and been left with a lengthy PDF document that is difficult to consume?

The Solution

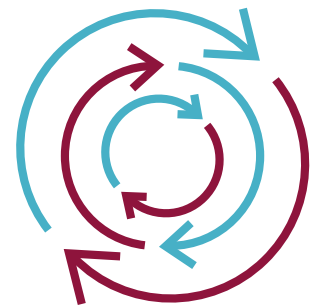

Introducing SureCloud's Cybersecurity-as-a-Service. SureCloud's cybersecurity consultants seamlessly integrated with our market-leading technology platform, delivering outcomes that will delight you and make you wonder why you had to struggle for so long. SureCloud's customers benefit from a partnership focused on delivering outcomes; tactical & strategic. Consultants can be scheduled to execute projects as part of a longer-term plan or accessed on-demand for urgent advice.

How does Cybersecurity-as-a-Service work?

SureCloud's Cybersecurity-as-a-Service subscriptions have been designed to provide a clear roadmap for security improvement.

1. We start by establishing a baseline, which can be aligned to NIST or ISO security frameworks.
2. We develop a customised managed security service, which is tailored to your specific requirements over the term of the subscription.
3. We ensure the agreed outcomes are realised by delivering regular reporting to key stakeholders.

Why SureCloud

SureCloud is a provider of cloud-based, integrated Risk Management products and Cybersecurity services, which reinvent the way you manage risk. SureCloud connects the dots with integrated Risk Management solutions enabling you to make better decisions and achieve your desired business outcomes. SureCloud is underpinned by a highly configurable technology platform, which is simple, intuitive and flexible. Unlike other GRC Platform providers, SureCloud is adaptable enough to fit your current business processes without forcing you to make concessions during implementation; meaning you get immediate and sustained value from the outset.
