

SureCloud®

DATASHEET

Secure Controls Framework (SCF)

The Joint Offering

The SCF provides a free to use, rationalized, IT, privacy and cybersecurity control framework that is baselined and mapped against 150+ global regulations and standards – a framework of frameworks. SureCloud users can now utilize the SCF control content and mapping directly into their SureCloud Compliance Management solution. Customers can populate SCF control data into their control library and take advantage of the pre-existing mappings and coverage across any required regulation and standard covered by the framework. Users can choose to customize these controls further to ensure they meet the needs of the compliance management program. Each control is supplied with maturity level guidance and question interpretations to make assessing third parties easy.

With SureCloud's Compliance Management solution, you can use the SCF controls to streamline multiple compliance programs as well as manage SCF control updates using simple accept/discard workflows. The previously time-consuming process of reviewing updates can now be done automatically, in a matter of minutes, streamlining the compliance change process.

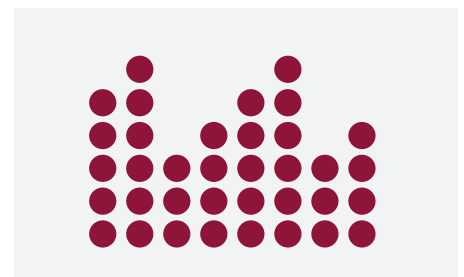

Is your Compliance Program...

- Inefficient and labor-intensive; managing multiple overlapping control requirements from different frameworks, regulations, and standards?
- Difficult to implement changes against; when changes happen, how do you document that control owners understood and confirmed the update?
- Complicated; making it hard to identify which controls are in place to meet each regulation and standard, and report the current state of compliance to the board?

SureCloud and SCF's Solution

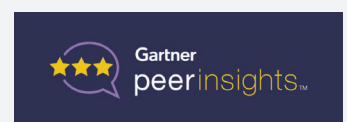

- Kickstart your compliance program by allowing free usage of any of the 850+ SCF controls.
- Allow easy control management by using SureCloud's central database to notify you when there are changes for you to review and accept/reject.
- Provide an easy, wizard-driven path to operationalizing and deploying controls against given context such as IT Assets, Processes and Organizational Structures.
- Help you manage the adoptions and updates of controls by revising the master control and pushing out updates to associated controls.
- Provide you with powerful insights via centralized, real-time dashboards and reporting.

“The Secure Controls Framework (SCF) garners a lot of attention from companies interested in deploying GRC/IRM solutions and is growing in popularity due to its control coverage and zero usage cost.

It is refreshing to see how SureCloud has developed a compliance management solution that consumes these controls in an exceptionally well thought out manner, giving equal consideration to deployment and control management.

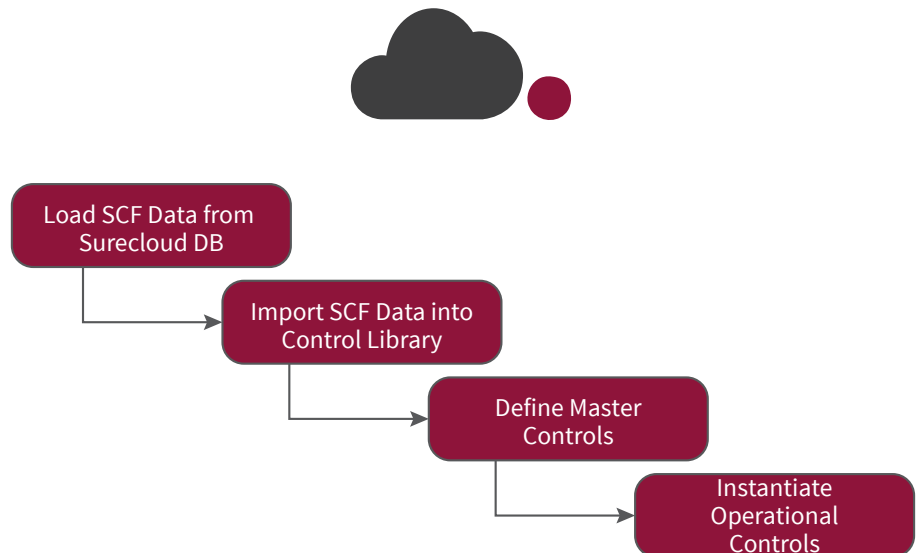

As a result, we are incredibly pleased with SureCloud’s adoption of the SCF as one of its built-in control sets. Their solution raises the stakes in the industry for a comprehensive compliance solution that helps to solve the difficult problem of control lifecycle management.

We look forward to a long-term relationship with SureCloud.”

Tom Cornelius - Founder & Contributor of Secure Control Framework

- 33 control domains and 850+ controls
- Controls are mapped and baselined to 150+ IT regulations and standards
- SCF controls formatted as questions, ready-to-go for use in the assessment
- Maturity descriptions for each control
- Wizard-driven process to seamlessly keeping up-to-date with updates and new controls as they are released.

Why SureCloud

SureCloud provides cloud-based, Governance Risk and Compliance products, and Cybersecurity & Risk Advisory services, which reinvent the way you manage risk. SureCloud connects the dots with Integrated Risk Management solutions, enabling you to make better decisions and achieve your desired business outcomes. SureCloud utilizes a highly configurable technology platform, which is simple, intuitive, and flexible. Unlike other GRC Platform providers, SureCloud is adaptable enough to fit your current business processes without forcing you to make concessions during implementation, meaning you get immediate and sustained value from the outset.
